PROFESSIONAL SUMMARY

Backend developer with +4 years of experience building SaaS and ERP platforms in Laravel, PHP, and MySQL, deployed on AWS. Delivered +15 projects across 3 companies and freelance work, including production systems for the Saudi market: a ZATCA e-invoicing platform that has submitted +60,000 invoices, Wasl vehicle-tracking sync, Noon Payments integration, and a POS system used by +3,000 clients. Experienced in REST API design, regulated third-party integrations, and mobile apps (Flutter, Android). Works closely with management and sales to turn business ideas into working products, proposes features and improvements, and leads backend delivery from requirements to release. Seeking a senior backend role with more architectural responsibility and a close link to product and business decisions.

TECHNICAL SKILLS

Backend: PHP 7/8, Laravel, MySQL, REST APIs, Node.js, JSON, AJAX

Integrations: ZATCA e-invoicing, Wasl, Noon Payments, Bookeey, HLS video delivery

Cloud & Tools: AWS, Git, SonarQube

Frontend: JavaScript, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS, DataTables

Mobile: Flutter, Android (Java)

Familiar with: Python, Java SE, UI/UX (Adobe XD)

PROFESSIONAL EXPERIENCE

Back End Developer – iDara.NET International For Information Technology Sep 2023 – Present

Full-time, On-site • Saudi Arabia • Laravel, PHP 8, MySQL, Node.js, AWS

- Lead backend delivery across the company's SaaS and ERP products: gather requirements from management and sales, plan the work, assign it to the team, and review deliverables against the requirement.
- Started several products from scratch, and propose and build new features and improvements independently.
- Built Fatoora, a ZATCA e-invoicing platform that has submitted +60,000 invoices.
- Built a real-time vehicle tracking platform integrated with Wasl, with live dashboards and reports.
- Integrated Noon Payments into iDara Sign (+100 clients) and developed its Flutter mobile app MVP, available on the App Store and Google Play.
- Worked on iDara ERP and Umra.net (+300 clients), covering invoicing, inventory, and hotel and transport management.
- Built the Trips Android apps for trip scheduling and live trip display.

Junior Back End Developer – We2up Jun 2023 – Sep 2023

Part-time, Remote • Egypt • Laravel, MySQL

- Built a clinic and store management ERP covering employees, partners, products, contacts, and income tracking.
- Developed the full admin dashboard, including data tables and reporting views.

Junior Back End Developer – AlBadr Systems Mar 2022 – Feb 2023

Full-time • Al Gharbiyah, Egypt • Laravel 5/8, PHP 7/8, MySQL

- Built Awazel, a construction ERP covering contracts, supply tracking, and cost oversight.
- Developed AlBadr For Sales, a POS system used by +3,000 clients, with invoicing, product and client management, and financial reports.
- Worked under SonarQube quality gates to keep code clean and maintainable.
- Built data-heavy admin screens with DataTables, Ajax, and Bootstrap.

Freelance Backend Developer Jan 2022 – Present

Laravel, MySQL, Tailwind CSS

- Built backend systems for clients across very different domains: OCR and document data extraction, video streaming and online courses, restaurant menu SaaS, real estate, and car dealership ERP (selected projects below).
- Took on smaller client tasks alongside full builds: adding new features, fixing issues in payment and third-party integrations, and handling deployments.
- Suggest features and improvements to clients based on their business needs, and build them.

PROJECTS

iDara.NET (2023 – Present)

iDara Sign – sign.idara.sa

Electronic signature platform with secure, trackable e-signatures, package pricing, and Noon Payments checkout, serving +100 clients. I developed the MVP release of its Flutter mobile app, available on the App Store and Google Play. **Tools:** Laravel, PHP, MySQL, Ajax, jQuery, Bootstrap, Noon Payments, Flutter

Fatoora (ZATCA) – fatoora.idara.sa
Synchronizes client invoices with ZATCA, with real-time submission and compliance reporting; has submitted +60,000 invoices to date. **Tools:** Laravel, PHP, MySQL, REST API, Ajax, jQuery, Bootstrap

Vehicle Tracking – tracking.idara.net
Real-time vehicle tracking with live dashboards, reports, and device synchronization with the Wasl platform. **Tools:** Laravel, PHP, MySQL, Node.js, Ajax, jQuery

Umra.net – umra.net
ERP used by +300 clients to manage Umrah, Hajj, transportation, hotels, and scheduling. **Tools:** PHP 7/8, MySQL, AWS, Ajax, jQuery

iDara ERP – idara.net
Core ERP platform used by +300 clients to manage customers, stores, invoices, and employees. **Tools:** PHP 7/8, MySQL, AWS, Ajax, jQuery

Trips Manager and Android apps – trip.idara.net
Web platform for scheduling and managing trips, with two Android apps: a trip scheduling app and a trip display app for vehicles. **Tools:** PHP 7/8, MySQL, Android (Java), Ajax, jQuery, Bootstrap

AlBadr Systems (2022 – 2023)

Awazel – *Private system*
Construction ERP covering contracts, supply tracking, and cost oversight. **Tools:** Laravel, MySQL, DataTables, Ajax, jQuery

AlBadr For Sales – *Private system*
POS system used by +3,000 clients, with invoicing, product and client management, cash tracking, and financial reports. **Tools:** Laravel 5/8, PHP 7/8, MySQL, Bootstrap, SonarQube

We2up (2023)

We2up ERP – *Private system*
Clinic and store management ERP covering employees, partners, contacts, products, and income. **Tools:** Laravel, PHP, MySQL, DataTables, Ajax, jQuery

Freelance – selected projects (2022 – Present)

Masahat Sukoon – masahatsukoon.com
Arabic e-learning platform with live and recorded sessions, Bookeey payments, and protected HLS video streaming. **Tools:** Laravel, MySQL, Tailwind CSS, Bookeey, HLS

Basmat Aqar – basmat-aqar.com
Real estate marketplace for finding, listing, and selling properties. **Tools:** Laravel, MySQL

Amwaj – *Private system*
Multi-tenant SaaS restaurant menu platform with real-time order, product, category, and offer management. **Tools:** Laravel, MySQL, Tailwind CSS, Ajax, jQuery

Highdam – *Private system*
Car dealership ERP for vehicle buying and selling, profit calculation, clients, and suppliers. **Tools:** Laravel, MySQL, DataTables, Bootstrap

Pie OCR API – *Private system*
REST API that extracts structured data from IDs and driving licenses. **Tools:** Laravel, PHP, MySQL, Tesseract OCR

EDUCATION

B.Sc. Computer Science – Mansoura University (FCIS) 2016 – 2020
Grade: Very Good
Graduation project: AR mobile app for virtual clothing try-on with a 3D avatar and AI outfit recommendations.

CERTIFICATIONS

- UI/UX Designer & Developer – Information Technology Institute (ITI), 2019
- AI Analyst Mastery Award – IBM, Sep 2019
- Android Development and Java SE Development – New Horizons, May 2018
- LinkedIn Skill Assessments passed: PHP, MySQL, REST APIs

LANGUAGES

Arabic: Native **English:** Professional working proficiency
